---

## Cancer Registry Software

**Oncostudio 4** is a set of software tools for the management of a cancer registry. Conceived by Oncology experts with ample experience in the methodology of cancer registry, Oncostudio 4 has the rank of "desktop medical suite for tumour registrars".

The current version comprises five modules:

- **Oncostudio Database** manages all the fundamental variables in a cancer registry.
- **Oncostudio Query** is the perfect tool for custom reporting and exporting filtered data.
- **Oncostudio Graph** brings you simplicity and power to produce visual output of analysis of your data.
- **Oncostudio Stat** is an advanced statistical analysis module to calculate frequency distribution tables of cancer grouped by ICD.
- **Oncostudio Surv** does calculation of Kaplan-Meier survival curves without the need of complex statistical tools.

### Main features

---

#### 1. Oncostudio Database

Oncostudio is a relational database for the management of patient records with a diagnosis of cancer. Oncostudio is a complete database that includes identification, diagnosis, treatment and evolution fields.

- Several tumours for each patient allowed.
- ICD, geographic and protocol codes management.
- Treatment and evolution control.
- Global preview of all the data that belongs to one patient.
- Backup to any windows device.
- Password system to protect patient data privacy.

#### 2. Oncostudio Query

Oncostudio is a powerful tool to query data. Its full flexibility gives you the ability to extract precise information from the registry of cancer.

- Free selection of the fields to include as columns.
- Filter records by any variable of the registry.
- Sort query results by any combination of fields.
- Save query parameters for later use.
- Export data results to MS Excel ®.

#### 3. Oncostudio Graph

When it is time to do statistics and to get graphical output of results, Oncostudio Graph does the work for you.

- Easy control panel to drive the statistics.
- More than 300 distinct presentations.
- Real-time graphic controls to final output.
- Save graphic parameters for later use.
- Export chart results to bitmap .bmp file.

#### **4. Oncostudio Stat**

Oncostudio Stat is an advanced statistical analysis module to calculate frequency distribution tables of cancer grouped by ICD.

- Dimensions of table selection: site, extension, treatment, age and sex.
- Restrict data to a time period filtering by date of diagnosis interval.
- Manage primary site groups (ICD-O criteria).
- Dynamic graphical presentation of results for each site group.
- Export tables to MS Excel ® with style definition.

#### **5. Oncostudio Surv**

A simple interface to plot Kaplan-Meier survival curves.

- Natural language editor of filter for data selection.
- Define survival time interval to study.
- Calculate up to 4 different curves for its comparison.
- Management of projects for its storage and later recovery.
- Print and export survival plots.

### **Specifications and requirements**

---

Oncostudio 4 is available in different editions to adapt to each registry according to necessities of operation, dimensions and topology.

#### **Oncostudio Standard**

- Use in a single computer
- Windows 98/Me/NT/2000/XP
- Easy migration to client-server edition

#### **Oncostudio Client Server**

- Use on a network (2 or more simultaneous users \*)
- Clients on windows 98/Me/NT/2000/XP
- Database server on windows NT/2000/XP

#### **Oncostudio Remote**

- Use on a remote client\* (phone line and/or internet)
- Requires client-server edition installed.
- Windows 98/Me/NT/2000/XP
- Requires a connection device (modem rtb, rdsi, adsl)

\* The network licenses work limiting the number of users who can use software simultaneously, so that it is possible to install the application client in a limitless number of client computers (local or remote).

## Technical support

---

Our service of technical support can be contracted in three different modalities:

### Basic

- E-mail support
- Time to response: 24 hours
- Duration: 12 months
- Includes minor upgrades (4.1, 4.2, ...) of same version

### Full

- E-mail and/or direct phone call support
- Time to response: 24 hours
- Protection of license for 2 users (150€ each additional user)
- Duration: 12 months
- Includes minor upgrades (4.1, 4.2, ...) of same version

### Incidence

- Technical support by incidence
- Direct support by phone and/or e-mail
- Help on installation, use of software and file repair
- Invoicing when problem is solved

## Prices

---

All prices are on European currency (Euro).

### ONCOSTUDIO 4.0 STANDARD

- New license ..... 600 €
- Upgrade from Oncostudio 3.0 ..... 300 €

### ONCOSTUDIO 4.0 CLIENT SERVER

- Basic pack (server + 2 users) ..... 1500 €
- Upgrade from Oncostudio 3.0 ..... 1200 €
- Upgrade from Oncostudio 4.0 Standard ..... 900 €
- 5 users license (requires Basic pack) ..... 1350 €
- 10 users license (requires Basic pack) ..... 3600 €
- > 10 users license ..... Ask

### TECHNICAL SUPPORT

- Basic - Email\* (1 year) ..... 250 €
- Full - Email + Phone call + Protection (1 year) ..... 1500 €
- Incidence – One hour support ..... 150 €

\*Free Basic technical support for the first year.
